SUMMARY

Computer Engineering student and MERN full-stack developer with a frontend focus on React and TypeScript. Built real-time, accessible and well-tested web apps using WebSockets, optimistic updates and performance optimization, with backend internship experience in Node.js/Express APIs and JWT authentication.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, SQL
Frontend: React.js, Redux, Context API, Tailwind CSS, Vite, Responsive Design
Backend: Node.js, Express.js, MongoDB, Mongoose, REST APIs, WebSockets, JWT Authentication, RBAC
AI Integration: LLM API Integration (Google Gemini, Groq)
Tools & Testing: Git, GitHub, Docker, CI/CD, Vercel, Render, Postman, Unit/API/Browser Testing, Chrome DevTools
Core CS: Data Structures & Algorithms, OOP, DBMS, Computer Networks

EXPERIENCE

TechSonix Jan 2025 – Mar 2025
Backend Developer Intern Remote

- Built and maintained Node.js/Express REST API endpoints with modular routing and middleware under senior guidance.
- Implemented JWT authentication, bcrypt password hashing and role-based access control (RBAC).
- Debugged backend issues, used Git, and collaborated on feature development and code reviews.

PROJECTS

Investify – Full-Stack Investment Planning & Market Research Platform
React 19, TypeScript/JavaScript, Vite, Tailwind CSS, Recharts, Node.js, Express, MongoDB, Playwright

- **React & Frontend Architecture:** Built an interactive financial planning SPA with React 19, React Router v7 and Tailwind CSS, featuring real-time compound interest calculators, Recharts charts and PDF export (jsPDF).
- **State & Async Lifecycle:** Designed auth and planning state with React Context and custom hooks (`useAuth`, `useDashboard`); fixed async race conditions with `useRef` counters and memory leaks with `useEffect` cleanup.
- **Performance:** Added route-level code splitting with `React.lazy` and `Suspense` to improve First Contentful Paint (FCP).
- **Backend & Data Integrity:** Integrated an Express/MongoDB REST API with JWT sessions, optimistic-locking plan revisions and proxy caching for Indian stock and mutual fund feeds (Upstox, MFapi).
- **Quality & Accessibility:** Wrote Playwright E2E and unit tests; verified WCAG accessibility with `axe-core`.

SyncBoard – Real-Time Collaborative Kanban Board
React, TypeScript, Zustand, Express, WebSocket, MongoDB, Zod, Vitest, Playwright

- Built a real-time board where multiple users create, edit and drag cards while changes, presence and live cursors sync instantly, using a WebSocket client with auto-reconnect (exponential backoff), heartbeat and status badge.
- Added optimistic updates with automatic rollback and an offline queue that replays on reconnect; typed all socket messages with Zod and TypeScript discriminated unions.
- Cut re-renders with split Zustand stores, memoization and throttled cursor events; made drag and drop keyboard accessible; tested with Vitest and Playwright; deployed on Vercel and Render.

BlogStack – Content Publishing & Discovery Web App
React 19, JavaScript (ES6+), React Router, Tailwind CSS, Axios, Vite, Node.js, Express, MongoDB

- Built a responsive single-page blog platform with modular UI, real-time client-side search and filtering, reusable form controls and dashboards to create, update and categorize content.
- Implemented React Router navigation and Axios REST integration with error handling and local storage persistence.

EDUCATION

International Institute of Information Technology (I2IT), Pune Expected 2027
Bachelor of Engineering in Computer Engineering – CGPA: 7 Pune, Maharashtra

Sanjivani K.B.P. Polytechnic, Kopargaon 2024
Diploma in Computer Engineering – 90.29% Kopargaon, Maharashtra
